Psychologists analyze human beings at different levels - accumulating information about the human behaviour, regulation of human interactions, human reflexion, mental functions and mechanisms, etc. Psychological Thought strives for corresponding to the goals of Psychology as a science, namely:

Psychological Thought should create conditions for stimulating development of psychological science. Parallel to this organizing role, the journal should co-operate for the propaganda of the achievements of psychology. Psychological Thought should reveal the defensive, integrating and controlling nature of Self; it should point out the process of transformation of human being into a cognitive personality; it should contest the prejudices and it should present the mechanisms for their surmounting; it should support the eclectic approach and every method for finding the truth about human life.

These and other tasks could be executed by Psychological Thought under the following conditions:

The contributing authors should increase in number, scientific areas, geographic location, and quality of scientific products. They are and could be University lecturers, psychologists working in scientific Institutes, consultants, educators, interdisciplinary experts, etc. The submitted materials need to present some theoretical analyses and statistic data processing. The facts should be assessed concerning their consequences for the personality, practice, behaviour, experiences, education and self-knowledge.

Psychological Thought needs a broad readership interested in the published scientific articles whose content is not ideological, nor yet journalistic.

Psychological Thought should publish articles on current important topics dealing with the contradictions of pluralism, individualism, humanism and anomy. The form and the linguistic expression are valuable elements of authors' ideas. The reviewer's decision is a constructive work that contributes to author's conception.

The Editorial team would like to warmly thank the following colleagues who devoted their time and effort as reviewers of one or more manuscripts from December 2011 to September 2012:

Natasha Virmozelova
Ivanka Asenova
Eugen Avram
Dashamir Berxulli
Violeta Boyanova
Marius Drugas
Zornitza Radeva Ganeva
Teodor Gergov
Desislava Ivanova

Ludmil Krastev
Ivan Krastev
Vasil Madolev
Stoil Mavrodiev
Mariya Mutafova
Ivelina Peneva
Silviya Savova
Vaska Stancheva
